The Legacy of LegaSea

It was out of necessity that the legacy was discovered. Tom Harper was given weeks to months to live. Today, four years later, Tom lives to tell his story. Already, upon hearing Tom's story, the demand around the world is becoming overwhelming. Everyday we hear more success stories from people from all over the world, who's lives have dramatically changed by the Marine Phytoplankton from Tom's sea farm showcased in ForeverGreen's products. Tom continues to see his legacy live on years after his doctor expected. His legacy is also helping to ensure the health of the marine life around the sea farm as production at the sea farm actually gives more back to the ocean than it takes in. Truly his legacy will continue to be far reaching and long felt.

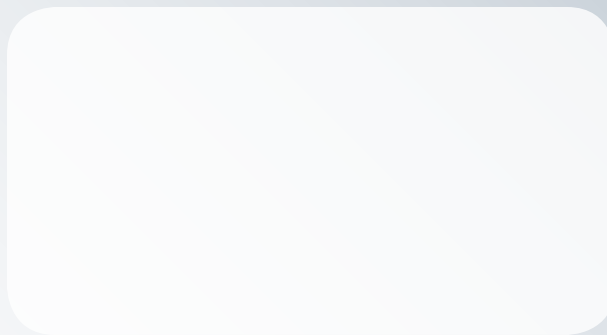

LegaSea is one of the exclusive ForeverGreen® brand opportunities.

In August 2003, ForeverGreen the company was launched. Now, a public company manufacturing its own products, ForeverGreen is an international company already doing business in more than 10 countries.

ForeverGreen is a company that stakes its future on timeless principles of health and humanity, and then trusting in the results.

ForeverGreen is an opportunity; a way of being. Whether we are young, middle-aged or older, it is to embrace every second of every season of our lives in a way that today's ceiling is tomorrow's ground floor.

Always green. Always growing!
ForeverGreen is truth.

ZMP 400

Zeolite Marine Phytoplankton Dietary Supplement

POWERED by
FOREVERGREEN
HEALTH, KINDNESS, OPPORTUNITY

ZMP 400

The perfect formula!

What makes ZMP 400 superior is the fact that it is naturally harmonized and activated by being infused into a base of 400 milligrams of our exclusive marine phytoplankton which is mineral-rich, including magnesium, calcium and phosphorus.

Why Zeolite?

Zeolites are a natural detox product, which help attract heavy metals from within the body on a molecular level. There is a strong tie between heavy metal toxicity and serious diseases. Eliminating these toxins can cleanse the body and strengthen the immune system. This can help to start your body's fight against serious health ailments.

The clinoptilolite form of zeolite has been used for more than 800 years in traditional medicine to improve general health in India, China, Russia and nearly every part of Asia. In essence, zeolites can be considered molecular filters who are able to trap positively charged atoms, ions, and harmful compounds for removal from the body.

Our zeolite is a volcanic mineral, free of soluble clay, that is extracted from the top of a highly-active environmentally clean geothermal region. Because of its natural purity, there is no decontamination process required (as other zeolite companies claim they have to do). Furthermore, we test and quarantine each batch of our zeolite supply after a very clean and protected method of transportation and handling. Zeolite, in small doses, is known for attracting and removing harmful metals, chemicals and toxins.

Since the Dawn of Mankind

FIRST, BEST and FINAL say in health and wellness... marine phytoplankton.

Tom Harper made history while creating his legacy by making the first and oldest food on earth, marine phytoplankton, available to mankind for the first time in history.

What is amazing about marine phytoplankton is that it is **FIRST**... the first food on earth... Tom Harper's first sea farm of its kind on earth... and ForeverGreen is the first to market it exclusively!

Marine phytoplankton is **BEST**... it is the base of the plant kingdom, in and out of the ocean... NASA declared that it is a major source of the Earth's oxygen... and we now know that many whales live on marine phytoplankton 100, even 200 years, while enjoying a healthy love life.

Lastly, marine phytoplankton is the **FINAL** say in health and wellness. It has 400 times the energy of any known plant, evidenced by its nutritional analysis! In essence, marine phytoplankton is a "checkmate" in the world of health. It doesn't get any better! Zeolite in a Marine Phytoplankton saline like base!

Lightly sweetened with Inulin.

What is Inulin?

Inulin is a natural sweetener that is obtained from certain roots and tubers. Inulin is an excellent choice for a natural sweetener. It has the ability to sweeten with minimal, if any effect on the sugar levels in the blood. It is an excellent alternative for low calorie diets and for people who must balance and control their blood sugars.

In addition to being used as a natural sweetener, Inulin is also a source of soluble fiber. Research states that soluble fibers may help lower blood cholesterol and glucose levels. Inulin is also a pre-biotic. It feeds and supports the good enzymes in the digestive tract.

It was an easy choice to add Inulin to the numerous all-around benefits of Marine Phytoplankton coupled with cleansing properties Zeolite. This exclusive proprietary blend is only available as a part of the LegaSea line and is sure to become a staple in your daily health regimen.

The site of the 30 Million Dollar sea farm where Tom Harper made his amazing discovery. Located where old-growth evergreen forest meet the clean cool waters of the Pacific Northwest.
